

# Republic day Celebration

28th January, 2021

## Notice

## Report

Computonics Club of PG Department of Computer Science organised a Poster Making Competition on "Dream India-2030" to celebrate Republic Day. The selected posters were displayed on 28th January, 2021 at 1:00 pm on online platform.

The main aim of this activity was to gain the views of students about the future vision of their country. Many students from various classes represented their thoughts into posters and one of our students presented a beautiful poem. It turned out that students want India to be scientifically advanced, technologically better and agriculturally advanced where logic and scientific ideas would prevail over blind faith and fanaticism. Cash prizes were given to the winners.
