DDU Kaushal Kendra started an **One Month In-house training on the topic of Web Development** for students of B.Voc. Software Development. DDU Kaushal Kendra started an **One Month In-house training on the topic of Web Development** for students of B.Voc. Software Development. In this training the students were made aware about different about different Content Management Systems. The overall goal of this workshop was to disseminate the knowledge of designing a small website using Joomla and WordPress. There were 20 students in the training.

Students of B.Voc Software Development undergoing training session

Student Feedback

The students thanked the college for the well-organized training on Web development.Overall the training was great. The students learned about technologies like HTML, CSS, PHP, Joomla, Word Press, Bootstrap, J-Query etc that are commonly used, for source projects. Training from the industrial expert made the students aware about the latest market trends.The training lead us to develop websites as mini projects.

Trainer Feedback

I would like to thank the College Management for giving me the opportunity to act as a trainer in the training.It was a great experience. Participants were very eager to know about different types of software and web development tools and techniques. We covered from basic knowledge of Programming Fundamentals to the advanced tools and techniques of Website development.

I found this kind of workshop is extremely beneficial for the students and they keep them updated about the latest technologies.

Departmental Staff Feedback

DDU Kaushal Kendra has been always making efforts to arrange such types of trainings workshop for the students. This training has been extremely useful for the students and the staff is really feeling delighted to have been able to be a part of it. It has been really well defined.

Report

During this training the students worked on following topics Joomla: Installation of Joomla, Wamp Server, Administrator- Global Configuration, Article Manager, Category Manager, Media Manager, Extension Manager, Template Manager. Joomla frontend, Templates, Linking CSS & JavaScript.

The students also worked on the following topics of WordPress: Installation of WordPress, Wamp Server, Post, Pages, Media, Exporting/Importing Contents and Plugins.
