

## **Agriculture Students visit at Kisan Mela Punjab Agricultural University (PAU), Ludhiana, Punjab**

Participants : 98 UG Agriculture students

PG Department of Agriculture, GSSDGS, Khalsa College Patiala B. Sc. (Hons. in Agriculture) Students visited Kisan Mela PAU Ludhiana with Agriculture teaching staff on dated 24.09.2019. There was so many innovative technology display as well as agriculture related industry like Seed company, Fertilizer Company, Organic Manure etc. Around 98 students went there. Students learn about innovative technology like Organic Farming, IPM, INM, IFS, SSNM etc. PAU Raises Questions over Microbial Technology Dr Shammi Kapoor, College of Basic Sciences and Humanities, PAU argues that microbes cannot manage paddy residue alone. Further, he stated that the integration of microbes with machine-based solutions is the need of the hour. Dr Kapoor and GS Manes, additional director of research have submitted a paper to the vice-chancellor on the management of paddy straw with microbes and machines. They said that their nine different microbial preparations are under evaluation at different locations varying with soil and climatic conditions. In all, though with some scepticism, farmers are willing to use the decomposer capsule. However, they claim that they will see its effect on wheat yield to continue to its use in the future.

**Tags:** bio masses, crop residue, decomposer capsules, Delhi pollution, haryana, IARI, Indian agriculture research institute, microbial technology, organic decomposer, paddy straw decomposer, paddy stubble burning, PAU, pollution, punjab, punjab agricultural university, seeds, soil enrichment, sowing of wheat, stubble burning, Uttar Pradesh
